Sprint 6.....	3

## User Stories I want to finish

User stories I want to finish are:

- US-03: AS a user I WANT to be able to set preferences on what kind of people I want to see SO I will have a higher possibility to find my preferred travel buddy.
- US-04: AS a user I NEED to see my liked travel buddies SO I can keep track of my potential travel buddies
- US-06: AS a user I WANT to chat with someone when we both liked each other SO I can see if we meet our expectations.
- US-07: AS a user I WANT to be able to update my profile status SO people can have a better view of me.
- US-08: AS a staff I WANT to be able to ban someone when they broke the rules SO the application will be more friendly and fewer people will be violated.
- US-10: AS a user I NEED to be able to like a person SO that person knows that I am interested.

## Sprint 5

First of all, the main function of my application needs to be implemented which is liking or disliking a user. The functions with updating settings for preferences will include this.

To make sure my application will use web sockets, a must in my application is the chat function.

User stories that are expected to finish by this sprint are US-03, US-04, US-06, and US-07.

## Sprint 6

The last sprint I want to finish is US-08 and US-10.
